List exactly 3 things you liked about the app's design or features.

34 responses

Response Summary

- **Design and Aesthetics:** Users frequently liked the overall look, premium design, beautiful animations, cool UI, aesthetics, color theme, and clean/intuitive/minimalist interface and layout.
- **User Experience and Performance:** Many appreciated the app's smooth performance, quick response to buttons, easy navigation, simple concept explanation, and user-friendly experience

- **Features and Functionality:** Specific liked features include the dashboard (showing stats/streaks and providing accountability), earning points, tutorials, the eco-action logging system, competitive point system, and learning about carbon reduction.
- **Organization and Clarity:** Respondents mentioned the features are clearly organized, sections are organized, and the app is easy to understand.

Convince, smooth and the design

N/A

X
Y
Z

1. The startup design
2. The smooth transition
3. The competitive point system

Ui , learning about how much carbon I stopped from being produced and sign up method

1) The UX is designed well.
2) The fact that this idea promote good habits.
3) The Dashboard, because it provides accountability.

List exactly 2 things that confused you or that you think should be improved.

Response Summary

learn" tab, and general feature guidance confusing, suggesting the need for clearer labeling, more instructions, or a short guide.

- **Design and UI/UX improvements:** Feedback included the color scheme being too bright, the design looking basic or childish, the "continue" button being hidden on the phone, and a desire for smoother animations/transitions.
- **Navigation and feature functionality:** Users suggested making navigation easier, preventing activity options from disappearing after selection, and improving clarity or grouping of features.
- **Specific feature suggestions:** Points for improvement included adding features, especially related to plantation or social awareness, implementing a proper database for signup, and reducing the focus on investment returns.

Maybe starting the app and getting used to the features

Front end

A
B

1. Whenever you select an activity the options goes away and it gets to the home page. Some can have multiple options to tick off. So it will be good if it stayed around until they press done or something like that.
2. Adding Something about plantation or social awareness about the subject would be nice.

Nothing really confused me but it lacks more features

1) I wasn't exactly sure what the "learn" tab was. Perhaps more time with the app would give me a better understanding.

2) I think a signup option with proper database could have been installed.
